Get involved ... or don't complaint when it's too late!

We invite you to join forces in one of the most crucial, and fast-growing, social movements in the United States. Please help us restore your due process rights! You may not realize it, but your due process rights (i.e. the right to be heard in fair legal proceedings) are being steadily removed by big corporations and financial power-houses; and in some instances, government offices and courts. This is accomplished by the use of a host of unfair and deceptive tactics; ranging from hidden and deceptive waivers in what you sign (or what you agree to) when you make major purchases, get medical treatment, apply for credit, accept a subsidy, wind up in a court proceeding, and much more. You are at a huge disadvantage when you are dealing with a dispute or legal issue and find out you have already waived your due process rights. Of course, there are instances where there is not much you can do to protect your due process rights (for example, your insurance company won't change its contract with you just because you want certain waivers removed). However, you can certainly choose who you want to do business with - and you are much better knowing in advance exactly where you stand! Also, you can take strategic actions and legal steps to obtain recourse in situations where your rights have been wrongfully stifled, suppressed, and/or removed by unfair and deceptive means. The bottom line is that learning more about your due process rights will dramatically increase your chances of taking proactive steps to protect your rights and your money.
